Notice in use of Rain Jacket.

When having a camera handle over the rain jacket, the surface is slimy and it causes the fall.

In use of the rain jacket, please use it with the tripod.

In case of the sprinkle, don't use it for long time.

Be careful of being flooded to the camera sufficiently.

There is no compensation for being flooded, the submergence, the fall in this product attachment.

■ **Main Features**

- * Rain Jacket for sprinkle.
- * By the large-sized transparent window in the side, the LCD monitor can be confirmed from almost any angle.
- * It is compatible for the optional tele conversion lens and wide conversion lens.
- * It is easy to attach and remove.

■ **Operation**

- * Attach it like the photograph below.
- * In attachment of the rain jacket, it isn't possible to use a camcorder with the light.
- * Be careful of the infiltration of water from the front hood part, the upper handle part, the view finder window specifically.
- * Shooting is possible with a little rain if using with the towel and so on.

The finder part prevents the infiltration of water by the tie-dyed cloth string structure.

The magic-tape and by the rubber processing, the crack which puts a hand in the lower part can be secured.
